---

With frequent blackouts during harsh winters and growing energy demands, the government has launched an ambitious plan to build large-scale storage facilities by 2030, backed by ...

All of it would be for a 1,000-megawatt, closed-loop pumped storage project--a nearly century-old technology undergoing a resurgence as part of the nation's clean energy transition.

Despite the construction delays, the IHA declared the project "a new global benchmark in the global hydropower sector," adding that "pumped hydropower plants like Fengning are essential for ...

Figure 2: The plot above visualises (logarithmic scale used) the estimated discharge durations relative to installed capacity and energy storage capacity for some 250 pumped storage stations currently in ...

A large lithium-ion battery storage project that contributes to grid stability and supports the integration of renewable energy, Leighton Buzzard Battery Storage Park is a 6,000kW energy ...

You know, when we talk about renewable energy adoption in East Asia, one project that's been turning heads lately is the Pyongyang energy storage project. Launched in late 2022, this ambitious initiative ...

The CAES project is designed to charge 498GWh of energy a year and output 319GWh of energy a year, a round-trip efficiency of 64%, but could achieve up to 70%, China Energy said. 70% would put ...

Discover how North Korea's ambitious energy storage project aims to stabilize its grid, support renewable adoption, and reshape regional energy dynamics.
