The National Energy Regulatory Authority (ANRE) announced on July 8 a new framework that eliminates the double taxation of electricity stored in battery energy storage systems (BESS), ...

Romania generates close to half of its electricity from renewable sources, yet it has limited operational battery storage capacity. That imbalance has increased the need for grid-scale ...

Analysts indicate that energy-storage deployment is one of the cornerstones of Romania's broader transition plan. "Developing this 1 GWh storage infrastructure is a strategic pillar ...

Romania is emerging as a key market for renewable energy storage. Explore the main laws, incentives, and opportunities shaping investments in batteries and hybrid storage projects.

The Ministry of Energy's ongoing public consultations on several emergency ordinances addressing renewable energy field and storage systems could be an opportune moment to address ...

Battery Energy Storage Systems represent the missing link in Romania's renewable energy infrastructure. These industrial-scale batteries capture excess solar generation during the day ...

Romania is quietly becoming one of Europe's most exciting energy storage markets. By the end of 2025, the country aims to reach 2.5 GW of battery energy storage systems (BESS) -- with ...

Romania has taken a decisive regulatory step in favor of its clean energy transition, removing the double taxation that hindered the development of battery energy storage systems.
