Learn the final results from MCC's El Salvador Compact that provided solar-powered electricity to reduce reliance on traditional energy sources.

El Salvador's reliance on solar reflects a rapid energy transition, signaling both a diversification of supply and the nation's increasing commitment to renewable energy.

As countries around the world shift towards renewable energy sources, El Salvador is gradually increasing its solar and wind energy capacity. While the progress is commendable, ...

Discover how new solar and wind projects are transforming El Salvador's energy landscape, reducing fossil fuel dependency and boosting renewable capacity by 2025.

This plant, projected to begin operations in 2026, will position AES El Salvador as one of the companies with the highest installed solar generation capacity in the country.

This 2.15 MWh system, integrated with a 3.6 MWp solar power plant in San Miguel, El Salvador, represents a major advancement in renewable energy for the region. The project, owned by the O& M ...

AES" Meanguera del Golfo solar plant--the first of its kind in Latin America--relies on enhanced solar-plus-battery storage technology to deliver uninterrupted, carbon-free electricity to isolated island ...
