---

As the core component of wind turbine (referred to as fan), blade directly affects the power generation performance and the reliability of the whole life cycle of the fan, and the cost of ...

Sany Heavy Industry (SH, 600031), the core enterprise of Sany, was listed on July 3, 2003. It is the first enterprise in China to successfully carry out the reform of non-tradable shares and realize full ...

Each year, Sany allocates between 5% and 7% of its total sales revenue to R& D projects, with the goal of providing even more world-class products for customers everywhere.

From the perspective of gross profit margin, Sany Heavy Energy's wind turbine manufacturing profitability is also higher than that of other companies. Although it has fallen by nearly ...

On June 12, the 500,000-kilowatt wind power project of Sany Heavy Energy Tower City was held in Torrey County. Sany Heavy Energy Tacheng 500,000 kW wind power project, is a key ...

The "brain" of SANY Smart Wind Farm has three main functions: digital interconnection, intelligent analysis, and closed-loop optimization. It is deeply integrated with the wind turbines to boost power ...

The weight of all 3.XWM products is comparably lighter, for example, the weight of 3.0MW product is about 95 tons, thus greatly save the hoisting cost and reduce the load of the whole wind turbine.

With an investment of nearly 1.5 billion yuan, the project manufactures domestically leading 10MW+ onshore wind turbines and 110m+ ultra-long onshore wind turbine blades, which are important large ...
