Small cells are characterized by compact size, low transmit power, good controllability, intelligence, and flexible networking. Indoor environments are complex and require diverse coverage ...

View the TI Small cell base station block diagram, product recommendations, reference designs and start designing.

OverviewTypes of small cellsUmbrella termPurposeFuture mobile networksMarket deployments to dateSmall cell backhaulSmall cells are low-powered cellular radio access nodes that have ranges from around 10 meters to a few kilometers. They are base stations with low power consumption and cost. They can provide high data rates by being deployed densely to achieve high spatial spectrum efficiency. In the United States, recent FCC orders have provided size and elevation guideline...
