CATL is bringing sodium-ion batteries to commercial scale, with plans to begin mass production of its new Naxtra cells in December 2025. The move positions the company to challenge ...

Chinese battery manufacturer Contemporary Amperex Technology Co., Limited (CATL) has confirmed it will commence mass production of its innovative Naxtra sodium-ion EV battery ...

According to the battery giant, mass production of these new types of battery packs which are suited to EVs and plug-in hybrids, will begin in December. The breakthrough here is the ...

The world's biggest EV battery maker has piloted the mass production of a long-range sodium-ion pack for passenger cars for the first time. CATL's Naxtra sodium-ion battery offers the ...

CATL, the Chinese battery manufacturer and global leader in energy storage, has officially launched Naxtra, the world's first sodium-ion battery for electric vehicles to reach mass ...

The establishment of this production line marks the transition of sodium-ion batteries from theoretical breakthroughs to large-scale industrialisation, particularly offering significant advantages ...

CATL has begun commercial production of sodium-ion batteries, which perform very well in the cold and have a long life expectancy.

Sub-US \$12 k city cars will likely adopt sodium packs first (range ~250 km), creating instant mass-production volumes. Low-cost anodes from bio-waste or pet-coke are the last major bill ...
