What is a roof mounted solar system?

Roof-mounted systems represent the most common solar installation method, particularly for residential applications. These systems maximize property usage while providing cost-effective solar access. Flush mounts position solar panels close to the roof surface, typically 2-6 inches above the roofline. This mounting style offers several advantages:

What is a solar mounting system?

A solar mounting system (or racking system) is a framework that securely attaches solar panels to rooftops, ground mounts, or other surfaces. Supporting Solar Panels : Ensures panels remain stable under wind, snow, and other environmental stresses. Optimizing Sun Exposure : Allows for tilt adjustments to maximize sunlight absorption.
