China Oil & Gas Pipeline Network Corporation (PipeChina) has achieved a significant milestone by connecting its first large-scale ground-mounted photovoltaic (PV) power project, the ...

Connecting the world's largest solar park to China's power grid is more than a technological achievement. It represents a pivotal moment in the global transition to clean energy ...

As China's new energy sector experiences rapid growth, Northwest China's Xinjiang Uygur Autonomous Region is bringing its unique strengths and resources into play to maximize its ...

Xinjiang, a region rich in solar and wind energy resources, has vigorously developed the new energy industry in recent years, accelerating the construction of large-scale wind and ...

This project, located in the desert region of Midong District in Urumqi, Xinjiang, has set a new record for the largest PV installation globally, surpassing previous benchmarks and solidifying its ...

Northwest China's Xinjiang Uygur autonomous region's energy storage capacity is accelerating at an unprecedented pace, fueled by a boom in renewable energy projects that position ...

The result of Xinjiang's PV power generation potential reveals that Xinjiang has great potential for the development of PV power generation. However, the construction of PV power plants ...

As the largest independent energy storage facility in southern Xinjiang, this project is expected to provide significant momentum for regional energy transition and economic development.
