Our solar research has been part of Australia's energy story for 70 years, and we're still innovating. Our research aims to make solar a renewable, adaptable and affordable power source for ...

See our world-leading research groups, meet our researchers and learn more about their work across solar PV and renewable energy.

The Australian Government through ARENA is supporting Australian research and development in solar photovoltaic and solar thermal technologies as part of its commitment to making renewable energy ...

The Australian Renewable Energy Agency (ARENA) has launched a new \$60 million (USD 39.14 million) funding round to support research and development (R& D) projects that can help make ...

Research and development projects funded by ARENA are making major strides in solar innovation to make the technology the backbone of the country's clean energy transition.

We are building strong collaborative relationships, solving the greatest scientific challenges, and delivering on long-term objectives for Australia, through innovative science, engineering and solar ...

Samsung C& T Renewable Energy Australia achieved its first milestone in Australia with the development and sale of a 300MW solar PV and 150MW/300MWh BESS project in Queensland, ...

With funding from the Australian Renewable Energy Agency (ARENA), CSIRO has demonstrated a new way to produce green hydrogen using concentrated solar energy and metal ...
