-----

We downgraded our five-year residential solar base case outlook by 7% compared to last quarter, primarily due to module supply constraints. In the near term, we now expect a slight decline ...

As the energy crisis fueled by Russia's invasion of Ukraine has subsided, demand for residential solar systems in the EU has declined and several residential solar incentive schemes ...

In this analysis, we examine the latest trends in installations, costs, and market dynamics, providing solar businesses, developers, and investors with a comprehensive picture of ...

We anticipate substantial demand growth for solar PV power in the coming years, driven by further cost improvements, product availability, and the numerous benefits the technology provides.

While our commercial and community solar outlooks have risen slightly due to enhanced project pipeline visibility, we've downgraded our residential outlook as tight module availability is ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Despite the positive solar panel market outlook, several restraints hinder the industry's full potential. Initial high installation costs can deter adoption, especially in emerging economies.

China and the US may be reducing policy support for the solar power sector, but Goldman Sachs Research still expects rapid growth, with solar installations set to rise by 57% between 2024 ...
