The page below includes information sourced directly from Solar for All grantees such as contact details, public websites, program summaries, the narrative part of some applications, and relevant press.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

Solar for All is more than just a funding program - it's a vital tool for advancing energy justice. Our energy system has historically placed the greatest burdens on disadvantaged ...

The Solar for All program, which is administered through NYSERDA, allows solar project developers to partner with National Grid to provide additional bill savings to low-income customers in ...

Electricity generation from solar, measured in terawatt-hours.

Solar for All will expand existing low-income solar programs and launch new ones. The 60 selected applicants will serve households in all 50 states, the District of Columbia, Puerto Rico, ...

By putting solar power within reach of everyone, this program is helping to build a more equitable and sustainable future. Not only does Solar for All make financial sense for families, but it ...

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what solar ...
