-----

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond Becquerel's 1839 discovery to Bell Labs' breakthrough and today's ...

In 1973, Elliot Berman founded Solar Power Corporation, a subsidiary of Exxon, and made huge strides in the cost of solar cell production. After 1973, oil companies used the extra profits to ...

In 1892, Frank Shuman was granted a patent for his invention of wired safety glass. Additional patents were issued relating to the process of making wire glass and machines for making wire glass. In 1914 Shuman invented a process for making laminated safety glass, called safety glass, and manufactured by the Safety Glass Company. In 1916 he patented a "Danger Signal" for railroad crossings, as well as the use of liquid oxygen or liquid air to propel a submarine.

Many argue that this event marks the true invention of PV ...

First Solar begins production in Perrysburg, Ohio, at the world's largest photovoltaic manufacturing plant with an estimated capacity of producing enough solar panels each year to generate 100 megawatts ...

What is the history of solar energy and solar panels? Humans used solar energy to start fires with the sun and glass. Learn about solar's history with ...

The history of solar energy is an American success story. Since the creation of the first silicon solar cell 70 years ago, solar leaders have been innovating, improving efficiency, lowering ...

Many argue that this event marks the true invention of PV technology because it was the first instance of solar technology that could actually power an electric device for several hours of a day.
