How do I use the SolarEdge Monitoring Platform?

Monitoring Platform Getting Started To use the SolarEdge monitoring platform, your system installer will create and register your system online. To activate your account: Click the link sent to you in the invitation email message. **Figure 1: Registration Form** Enter your details as follows:

What is a SolarEdge monitoring login?

If you're tracking your home solar system, your SolarEdge monitoring login is your most important tool. It gives you a real-time, panel-by-panel view of energy production, ensuring you're maximizing your investment every day. Most of the time, that dashboard gives you great news--but sometimes, it brings bad news.

How do I check the performance of my SolarEdge system?

To access your system's performance, you need to use the official SolarEdge monitoring login. This is usually done through one of two ways: the Web Portal for deep analysis, or the dedicated mobile app (often referred to in searches as My Solar Edge login) for on-the-go checks.

How do I download my SolarEdge app?

App Download: Download the My SolarEdge app from your device's store for mobile access. If you are a new homeowner and need to take over an existing system, you must initiate an ownership transfer with SolarEdge customer support--you cannot simply create a new login without administrative access to the site. **Need a Repair? GreenLancer is Here.**

Register your SolarEdge PV system to access the monitoring platform and manage your solar installations efficiently.
