The Government of Somalia is working with several partners to ...

Specializing in renewable energy storage since 2000, we deliver turnkey solutions for wind-solar hybrid systems and smart water pumping applications. Our modular designs serve both residential and ...

The Global Renewables and Energy Efficiency Pledge, made at the 2023 UN Climate Conference in Dubai (COP28), alongside international climate finance commitments, offers a window of opportunity ...

In July 2023, Somalia announced its new energy storage development policy - a strategic move to stabilize power supply while accelerating renewable energy adoption.

The Government of Somalia is working with several partners to transition to renewable energy, as highlighted in the Somalia Power Master Plan and Somalia National Development Plan.

The government department is seeking bids for the design, supply, installation, testing and commissioning of hybrid/off-grid solar PV plants with battery energy storage systems (BESS) at the ...

At 300MW / 1,200MWh, the BESS is considerably larger than the 250MW / 250MWh Gateway Energy Storage project brought online earlier this year by LS Power, also in California. Not only that, but ...

Let's cut to the chase: the Mogadishu Goldwind Energy Storage Project isn't just another solar farm gathering dust in a boardroom slide. This 120MW hybrid power initiative is Somalia's first large-scale ...
