South Korea has actively promoted the use of renewable energy sources in recent years to increase its share in the country's energy mix. This and the warming temperatures brought on by ...

South Korea's Ministry of Trade, Industry, and Energy (MOTIE) has launched its first solar energy tender for 2025, aiming to procure 1 GW of solar power. This initiative is a key part of South ...

Solar power in South Korea has developed from small-scale research programs of the 1970s into a key component of the nation's renewable energy strategy. South Korea has expanded solar photovoltaics ...

South Korea's 11th Basic Plan for Long-term Electricity Supply and Demand ("BPLE"), finalized in 2025, targets a 50% reduction in greenhouse gas emission by 2035 and net-zero carbon ...

South Korea is set to significantly increase its solar energy capacity, with ambitious targets and key policy measures supporting its long-term renewable energy goals.

The South Korean Ministry of Trade, Industry and Energy (MOTIE) is inviting proposals for a 1 GW solar energy tender launched alongside the call for 1.25 GW of wind ...

South Korea's Ministry of Trade, Industry and Energy (MOTIE) has decided to build a data center complex in Haenam County, South Jeolla Province, in cooperation with Korea Electric Power ...

Solar power in South Korea has developed from small-scale research programs of the 1970s into a key component of the nation's renewable energy strategy. South Korea has expanded solar photovoltaics generation with tools and initiatives such as legal frameworks, feed-in tariffs, national basic energy plans, and municipal programs. Installed photovoltaic capacity grew rapidly in the 2000s and 2010s, but despite years of progress, the nation's solar sector faces challenges such as pollution, atmospheric co...
