Following the expansion, SDG& E's Westside Canal complex will feature 231 MW of energy storage and will be the largest asset in SDG& E's utility-owned battery storage portfolio.

SDG& E has been rapidly expanding its battery energy storage and microgrid portfolio. We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage ...

This article explores how the city's largest solar energy storage system is transforming local power grids, reducing carbon footprints, and setting a benchmark for clean energy adoption. Discover the ...

In recent years, SDG& E has more than doubled its utility-owned energy storage capacity.

The West Side Canal facility now boasts 231 MW of energy storage capacity and is the largest asset in SDG& E's utility-owned battery storage portfolio. This expansion represents a ...

The 131MW Westside Canal project located in Imperial Valley - home to a high concentration of solar, wind, and geothermal generation facilities - is the largest storage asset in ...

The Westside Canal is the largest storage asset in the energy delivery company's utility-owned energy storage portfolio, and Fallbrook is the second largest in its portfolio.

Once fully operational, the Westside Canal facility will feature a total energy storage capacity of 231 MW, becoming the largest asset in SDG& E's utility-owned battery storage portfolio.
