Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20" sea ...

While traditional stationary solar power systems are normally cumbersome to install and difficult to relocate, folding PV containers make use of innovative articulated panels and a hydraulic ...

The Solarfold photovoltaic container can be used anywhere and is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system ...

The solarfold Photovoltaic Container is mobile for universal deployment with a light and versatile substructure. The semi-automatic electric drive unit manoeuvres the mobile photovoltaic system into ...

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations.

Our Solarfold(TM) containers can be fully deployed and operational in under 6 hours. The automated unfolding system allows for quick setup without needing extensive technical expertise or heavy ...

Its portability and foldability make it ideal for temporary or emergency power needs, such as construction sites, outdoor activities, military operations or disaster relief. In addition, due to its ...
