The latest Renewable Energy Master Plan (2019-2033) is targeting the development of nearly 2.5 GW from utility-scale solar and wind projects and 850 MW from distributed generation (rooftop solar, solar ...

"Sudan is endowed with abundant resources, particularly solar energy, yet we have only scratched the surface of our potential," Al-Rikabi notes. The country's solar energy potential is ...

Following its recent announcement to expand utility-scale solar resources to 2,025 megawatts (MW) by 2025, Salt River Project (SRP) today announced three new solar energy plants that will deliver a total ...

The study used techno-economic analysis for two of the most mature CSP technologies - solar power tower (SPT) and parabolic trough (PT) technology - to produce electricity in Sudan. Two ...

The United Nations Development Programme (UNDP) and the Government of Japan have announced a \$1 million initiative to install solar-powered infrastructure in Sudan's Blue Nile and ...

Discover how Huawei's massive 1,000 MW solar project and 500 MWh battery storage system are transforming Sudan's energy landscape and driving sustainable growth.

In the wake of prolonged conflict, Sudan faces a critical juncture in its energy sector. The country's renewable energy potential presents both opportunities and obstacles, shaped significantly...

Research and projects on solar energy in Sudan have primarily concentrated on solar PV systems, with relatively limited focus on solar thermal energy. Nevertheless, there are some studies that have ...
