Looking for an energy-efficient way to cool your home? Our guide to choosing the best solar air conditioner for you has everything you need to know.

There are two types of solar air conditioning with solar panels: absorption or hybrid. Both installations must be carried out by a licensed installer who is knowledgeable about refrigerant gas ...

Long term, Lewerth says Aira is planning to add solar and batteries to its offering and the company's ultimate ambition is to manufacture and install a full home-energy setup.

The tool provides a high-level feasibility assessment for installing any type of air conditioning (AC) system and aims to promote the uptake of solar ACs at field level and reduce our ...

Ground source heat pumps (GSHP) are common in Sweden, but solar energy systems are not. GSHP could offer an ideal platform to integrate solar energy into the building and national energy systems ...

Sweden's below-freezing winters require 60% more heating energy than Central Europe. Yet their 2040 renewable target demands elimination of fossil-fueled boilers.

We install air conditioning systems designed to optimize energy use while providing effective cooling. Our solutions cater to residential and commercial needs, ensuring a comfortable indoor climate when ...

At EA-Global, we remain committed to providing exceptional solar services in Sweden. Our experienced team ensures the integration of durable, efficient, and sustainable solar solutions into your projects.
