Northvolt Drei was a planned battery factory in Dithmarschen near Heide, Germany. Announced in 2022, it was green lit in January 2024 following EUR902 million funding approval from the European ...

It began producing batteries in 2021 at its factory in Skellefteå, Sweden, and has since expanded with plans for additional gigafactories in Europe and North America.

Just last month, Stockholm unveiled Northern Europe's largest lithium-ion storage array - 150 connected containers storing enough energy to power 45,000 homes during winter blackouts.

Just shy of the Arctic Circle, you'll find Northvolt Ett - a lithium-ion battery gigafactory that stands as Europe's first homegrown response to opportunities and needs of an electric world.

The choice of location is deeply rooted in the region's abundant supply of hydropower. With access to vast reserves of renewable energy, Northvolt stands as a beacon of sustainable ...

Introducing our cutting-edge lithium iron phosphate container BESS solar battery energy storage system, ranging from 250KW to 1200KW. As a factory, we ensure top-notch quality & performance. ...

The plant was intended to research and improve the lithium battery cell manufacturing process for mass production at Northvolt's Skellefteå gigafactory, not far below the Arctic Circle in ...

Below is a list of companies involved in the battery value chain, which encompasses all stages of battery production, distribution, and recycling, with a particular focus on lithium-ion batteries used in electric ...
