What is ABB battery storage & how does it work?

Aimed at commercial and industrial users, the model takes capital costs out of the equation by offering battery storage as a fully managed, subscription-based service. Rather than owning and maintaining the system, clients pay a regular fee while ABB looks after the design, installation, operation, and upkeep.

What is battery energy storage systems-as-a-service?

ABB today announced the launch of its new Battery Energy Storage Systems-as-a-Service (BESS-as-a-Service) - a flexible, zero-CapEx solution designed to accelerate the shift to clean, resilient and affordable energy.

Where are ABB Energy Storage systems used?

ABB officially opened its new plant for energy storage systems for mobility applications today in Baden, Switzerland, at a ceremony attended by customers, politicians and media representatives. The energy storage systems will be used in railways, e-buses/trolleybuses and e-trucks.

What is Bess-as-a-service (ABB)?

BESS-as-a-Service is underpinned by performance guarantees, as well as coverage for maintenance costs and energy trading brokerage fees. By managing all aspects of energy market participation, ABB enables customers to effortlessly reap immediate financial benefits from selling excess energy.
