Together with a Nobel laureate in Chemistry, the founders of Swiss Battery invented and developed a true renewable, sustainable and "green" high energy-density battery technology.

Swissgrid sees battery storage as a key technology for the energy transition. It not only facilitates the integration of renewable energies, but also increases the flexibility of the entire ...

The company specializes in developing rechargeable accumulators using non-critical raw materials to create sustainable, high-energy-density batteries for electric aerial vehicles and electric cars.

Headquartered in Switzerland, we deliver scalable, site-ready solutions that integrate battery technology, power conversion and intelligent energy management into one reliable system.

Utility EWS AG and developer MW Storage have completed the expansion of a battery energy storage system (BESS) project in Switzerland from 20MW to 28MW, making it the country's ...

LiTHiUM System, formerly LiTHiUM Storage GmbH, headquartered in Illnau, Switzerland, has been supplying customers throughout Europe with high-quality lithium iron phosphate (LiFePO₄) batteries ...

LMB was developed to meet the need for cheap and robust large battery systems for the grid. Its design consists of three layers of liquid metal kept at a high temperature, all three active components being ...

Redux Energy supplies Battery Energy Storage Systems (BESS) in line with Swiss quality standards, which are the highest in the world in terms of safety, longevity and performance.
