-----

The project consists of a 600,000-kilowatt photovoltaic project in Jiashi County and a 500,000-kilowatt photovoltaic project in Yecheng County. It is the first market-oriented grid-connected power ...

“Based on the national residential electricity consumption in 2024, the 2 billion kWh of green electricity generated here can meet the annual electricity needs of more than 1.8 million ...

China National Petroleum Corporation (CNPC) has marked a major step in its green transition with the successful commissioning of its largest-ever solar project at the Tarim oilfield in the ...

In January 2025, China National Petroleum Corporation (CNPC) commissioned its largest-ever solar project at the Tarim oilfield. The 1.3 GW photovoltaic facility has been connected to ...

The oilfield has completed and put into operation photovoltaic (PV) power generation projects with a total installed capacity of 1.3 gigawatts (GW) in areas such as Yuli, Qiemo, Yecheng, ...

The green energy is equivalent to 22,200 tonnes of standard oil, reducing carbon dioxide emissions by 70,500 tonnes, and the electricity that can be used by more than 40,000 households for ...

To date, Tarim Oilfield has completed five centralized solar power projects with a total installed capacity of 2.6 million kilowatts. There are also 239 distributed photovoltaic projects at ...

“The PV device supporting the zero-carbon desert highway generates about 11,000 kilowatts of electricity per day, and all 109 water wells along the highway use clean electricity for ...
