What is the range of an electric car?

The most common electric car range is 68 miles (109.4 km). Electric cars have a total range as low as 29 miles (46.7 km) to as high as 520 miles (836.86 km). Previously, the electric car with the longest range was the 2021 Tesla Model S Long Range, which has a total estimated range of 405 miles.

Does the EPA test EV range?

The EPA provides range estimates for every electric vehicle, but they don't test EV range in the real world -- and Edmunds does. Read all the latest real-world EV test results from the Edmunds experts.

Which electric car has the longest range?

Lucid Air took the top spot in late 2021 with the release of their electric cars. The electric car with the longest range is the 2022 Lucid Air Dream Range with 19in wheels, with a total range of 520 miles. Get key Lucid Air details here: [Lucid Air Charging Cost & Time \[KWh/Mile, Capacity & More\]](#).

How do I find the range of an electric car?

If you're looking for the range of a specific electric car, simply hit Ctrl + F (on Windows/Linux) or Cmd + F (on macOS OSX) to search for a model. The table below lists over 277 electric car models and their total range. The list is arranged from longest to shortest range. The ranges listed are EPA.gov estimates.
