What is Tesla's Lathrop megafactory?

The Lathrop Megafactory is Tesla's first dedicated facility for its flagship battery storage system. It currently stands as the largest utility-scale battery factory in North America. The facility is capable of producing 10,000 Megapack batteries every year, equal to 40 GWh of clean energy storage.

Where are Tesla megapacks made?

For those who don't already know, Tesla's Megapacks are being produced at dedicated Megafactories, with the primary one located in Lathrop, California. Now what is a Megapack exactly?

Why is Tesla building a Megapack?

Tesla's Megafactory team in Lathrop, California, reached a major milestone on November 4, 2024, by building its 10,000th Megapack. Tesla's Megapack units play a critical role in large-scale energy storage, supporting a transition to renewable energy by helping stabilize power grids, prevent outages, and reduce reliance on gas-powered peaker plants.

Will Tesla build a second megafactory in China?

To support the Lathrop Megafactory, Tesla is currently building a second Megafactory in Shanghai, China. This Megafactory is expected to start producing the first Megapacks in Q1 2025, allowing Tesla to supply China and other international markets more easily than from California. Last week Tesla announced two other production milestones.

Explore Tesla's milestone achievement with the Lathrop Megafactory, its strategic expansion with the Shanghai Megafactory, and the revolutionary impact of Megapack batteries on ...

The Tesla Lathrop Megafactory recently achieved a new milestone. As per the official Tesla Megapack account on X, the Lathrop Megafactory has produced its 15,000th Megapack 2 XL ...

Tesla has reached a milestone by producing its 15,000th Megapack 2 XL at the Lathrop Mega Factory in California, marking a total production capacity of 58.5 gigawatt-hours (GWh). The ...

Tesla is seeking a highly motivated Test Engineer to contribute to the continuous improvement of Manufacturing Test Equipment for the Megafactory Production Engineering team.

Tesla celebrated the milestone with a photo of the Lathrop Megafactory team posing with a freshly produced Megapack battery.

Megafactory is one of the largest utility-scale battery factories in North America. Learn more about the opportunities available in Lathrop, CA and the benefits of working at Megafactory.

Tesla's Megafactory in Lathrop, California, represents a pivotal shift in energy storage solutions, focusing on producing the highly sought-after Megapack systems. This facility not only ...

Tesla's Megafactory team in Lathrop, California, reached a major milestone on November 4, 2024, by building its 10,000th Megapack. Tesla's Megapack units play a critical role in large-scale ...
