Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetise gas resources through the creation of domestic gas-to ...

As renewable energy adoption grows globally, Equatorial Guinea is embracing innovative energy storage technologies to stabilize its power grid and support sustainable development.

Equatorial Guinea, a small but resource-rich nation, is rapidly embracing lithium battery energy storage solutions to address its growing energy demands and renewable integration challenges.

August 23, 2019: Equatorial Guinea is set to construct the first liquefied natural gas (LNG) storage and regasification plant in West Africa, advancing efforts to monetise gas resources through the creation ...

Huawei Digital Power has announced the signing of a key contract with SEPCOIII for its NEOM Red Sea project, which involves 400 MW of PV plus a 1300 MWh battery energy storage solution (BESS), ...

Equatorial Guinea's 20MW energy storage project isn't just about batteries - it's about powering progress. From stabilizing hospitals to attracting foreign investment, this initiative proves that smart ...

For residents and businesses in Equatorial Guinea's capital, energy storage in Malabo isn't just a technical buzzword--it's the missing puzzle piece for reliable electricity.

Feature highlights: This 220V Portable Mobile Digital Power Supply is designed for outdoor emergency energy storage, featuring a lithium battery with a capacity range of 252WH-756WH ...
