Designer Yves B&#233;har's studio Fuseproject has created a family of portable power stations with accompanying solar panels for US start-up Yoshino, utilising ultra-efficient solid-state...

Yoshino introduces the first portable power station with solid-state battery technology. The B4000 delivers extremely high output to cover most power demands.

The debut of this technology at Bowie State University comes just 5 years after another first-of-its-kind SolGreen&#174; technology-the Evodia Solar Table, was installed on the BSU campus making us the first ...

In a groundbreaking partnership, Yves B&#233;har and fuseproject ...

In a groundbreaking partnership, Yves B&#233;har and fuseproject have joined forces with Yoshino Power to introduce the world's first series of solid-state portable power stations.

In this video, we break down the world's first commercial all-solid-state EV battery, promising ultra-fast charging, extreme safety, massive cycle life, and higher energy density than today's...

Yoshino Technology announced two new features on the market's first solid-state technology (SST) solar generator adaptable power stations. All models (B330, B660, B2000 and ...

More than a decade ago, Northwestern chemists and materials scientists reported in Nature the first solid-state solar cell based on a halide perovskite semiconductor--an advance that ...
