The largest solar power plant in the world is the Bhadla Solar Park, which was completed in 2020. This solar thermal power plant is located in Bhadla in the Jodhpur district of Rajasthan, India.

Discover the 5 biggest solar power plants in the world (2025). Learn their capacity, country, and role in shaping global renewable energy.

Discover the world's largest solar farms in 2025. Complete rankings, capacity data, locations, and analysis of mega solar projects transforming global energy.

Amid the growing urgency of climate change, the emergence of solar parks capable of generating clean energy couldn't be more timely. This blog explores the largest solar power parks in ...

With a final capacity of 2.25 GW across 5,600 square kilometers, Bhadla Solar Park in India is the largest solar power facility in the world to date. Located in the village of Bhadla in Rajasthan, this ...

In June 2024, China connected the 3.5 GW Midong solar project near $\text{r}\text{m}\text{q}\text{i}$ in Xinjiang to the grid, making it, at that moment, the world's largest single operational PV plant. The installation...

Commissioned in 2019, Golmud Solar Park in China's Qinghai Province comprises 80 separate solar plants with over 7.2 million solar panels providing a capacity of around 2,800MW, making it the ...

Find a list of solar photovoltaic plants that are currently considered the largest on the globe. We have listed the ground-mounted utility-scale stations, which have already been connected to the power ...
