The Boluo Temple mountain monastery finally has solar power for an electric stove and space heater. That's enough for monks who refuse the luxuries of fully charged modern life.

Ten panels at the Boluo Temple provide power for the monks, as well as a ginger cat named Flower. Read more at [straitstimes](#) .

Some of the solar arrays on the roof of the school's main building, which have eliminated the school's dependency on traditional power sources.

Tibetan Buddhist monks celebrate the electrification of the prayer hall at Lingshed Monastery, in the Ladakh region of the Himalayas. The LED lights are connected to solar direct ...

In just the past few years, the centuries-old temple for the first time gained access to electricity -- not from the country's grid, but thanks to solar panels installed in its backyard.

The Solar Powered Monk features solar panels that convert sunlight into electricity, providing a sustainable energy source for its operations. Accompanying this technology is an energy ...

Located in the forests of Thailand's northeastern Ubon Ratchathani province, the Solar School is powered entirely by solar energy and costs only a dollar per month for the electricity ...

A model of the grade I listed building Bath Abbey showing solar panels installed on the south side of the nave roof. This model was produced by software that generates a prediction for the ...
