---

A cluster of islands in France started putting solar panels in their cemetery a while back, with plans to generate 1.3 megawatts by 2025 -- enough to power 4,000 homes.

Valencia, famed for paella and now potentially its eco-conscious ghosts, has already installed the first batch of photovoltaic panels in three cemeteries. By the time the project is ...

The residents of Saint-Joachim in Pays de la Loire, France, are putting solar canopies over their cemetery. The 1.3-megawatt (MW) solar canopy will cover the Saint-Joachim cemetery ...

Around 7,000 photovoltaic panels have been placed on crypts and ...

In the town of Saint-Joachim, in Loire-Atlantique, a unique project in France plans to cover the town's cemetery with 9 m<sup>2</sup> of photovoltaic panels in the form of shade structures.

Around 7,000 photovoltaic panels have been placed on crypts and other structures in public cemeteries in Valencia, according to a European Union fact sheet that details the project.

A French town is installing a canopy of solar panels over its cemetery that will distribute energy to local residents. The idea didn't start with solar.

Launched in May 2024, the project involves installing solar panels in multiple cemeteries across Valencia.
