Battery storage developer Eku Energy has partnered with utility Tokyo Gas on a grid-scale energy storage project in Japan, with construction expected to start soon.

Japan currently has three major pumped hydro projects in various stages of completion, including one serving Tokyo that will have the world's third-largest pumped-storage power capacity ...

Tokyo Asset Solution will diversify into battery storage, starting with a 4.9MWh grid-scale project in Hachioji City, Tokyo, and a co-located 8.3MWh system at the 2MWAC/2.2MWDC TAS ...

Tokyo's new large-scale energy storage project is set to begin construction in Q1 2025, marking Japan's most ambitious battery storage initiative to date. This renewable energy solution aims to address ...

With the addition of Ishikari Offshore Wind, Pattern Energy has eight renewable energy facilities in Japan either operating or under construction, including three onshore wind power facilities ...

12 grid-scale BESS projects totaling 180MW/595MWh secure 13B yen from Tokyo's FY2024 subsidy scheme Enehub Archive · March 7, 2025

With limited space for solar farms and wind turbines, energy storage systems (ESS) have become the linchpin of Japan's clean energy transition. So what companies are actually making this happen in ...

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage systems, and off-grid systems, enabling energy self-sufficiency.
