The UN in Timor-Leste, under the leadership of the Resident Coordinator, has now started lighting the way with its solar-powered grid which has begun to give maximum dividends.

The project is expected to comprise of a utility scale photovoltaic (PV) solar power plant of up to 100 megawatt (MW) and supporting infrastructure. A Battery Energy Storage System (BESS) may be ...

KUALA LUMPUR, Oct 17 (Reuters) - East Timor expects the construction of its first large solar power plant to begin in 2026 and become operational months later, the state utility's chair...

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher.

The construction of the solar power plant is a key component of East Timor's strategy to diversify its energy sources. The country has been heavily reliant on fossil fuels, but this new ...

The landmark project includes drafting and negotiating a power purchase agreement (PPA) and an implementation agreement with the Ministry of Finance, marking a significant step in ...

The Project supports Timor-Leste's transition from expensive, oil-dependent generation to a more efficient, resilient, and fiscally sustainable power system.

The Minister of Public Works, Samuel Marçal, said that the new photovoltaic solar energy project "will bring significant benefits to Timor-Leste, contribute to sustainable development and environmental ...
