A high-level delegation led by the Ambassador of Japan, UNDP Resident Representative, and INFPM Executive Director conducted a monitoring visit to assess the installation of a hybrid solar ...

A study was done, at the national level, which will allow the development of an energy policy for Timor-Leste. The study was concluded on the 29 May and analysed several sources available in our ...

EDTL has invited, through an international public tender, proposals for the development of the Project by independent power producer ("IPP"). Once selected, the IPP is expected to establish a special ...

The Project involves the construction and 25-year operation of a new power plant in Manatuto, Timor-Leste, comprising a 72 MW solar power plant co-located with a 36 MW/36 MWh battery energy ...

Timor-Leste plans to implement 72 MW solar and 50 MW wind by 2024 and 2026 respectively. This will increase RE share in power generation from 0.2% in 2021 to 35.4% in 2030. Under the current ...

In this study the PSO algorithm will be applied to find the optimal value in determining the number of PV generating units, wind turbines and batteries. The case study of this study was conducted at the ...

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

Access to reliable and sustainable electricity remains a critical challenge in Timor-Leste. This island developing nation relies on imported diesel for over 99%
