STIN knows the importance of green energy. STIN endeavors for protecting the precious value.

The outdoor energy storage system supports the flexible expansion of PV capacity and simultaneous access to load, battery, grid, DG, and PV, highlighting its role tailored for small C& I energy storage ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

The Outdoor Cabinet Energy Storage System is a fully integrated solution that combines safe battery storage, intelligent power management, and weatherproof protection for solar and telecom applications.

Multiple devices in parallel to form a small & medium energy storage system easily. Meet the needs of peak load shifting, dynamic capacity increase, demand management, backup power, etc. Compatible ...

The outdoor energy cabinet supports hybrid configurations with solar + battery + grid or diesel generator. The EMS intelligently switches among power sources for optimal cost-efficiency and continuity.

Optimizing the use of renewable energy: Maximize the use of photovoltaic power during the day, while excess power is stored for use at night. Peak shaving & Valleyfilling: Supply power to the ...

Designed for harsh environments and seamless integration, this IP54-rated solution features a 105KW bi-directional PCS, optional air- or liquid-cooled thermal management, and parallel operation ...
