We are Volfpack Energy, a Sri Lanka-based company driving the future of sustainable energy storage. Our team of innovators designs advanced supercapacitors that charge faster and store more energy ...

Construction of a utility-scale solar-plus-storage project is now underway in northern Togo. The 25 MW Dapong solar project will include 36,000 solar panels across 52 hectares, along ...

This agreement will finance feasibility studies for a battery energy storage system (BESS) project in Togo - a crucial step to integrate more renewable energy and achieve universal access to ...

Togo is launching a pilot battery energy storage project to stabilize its national grid and accelerate the country's shift toward renewable energy.

The Togo Lithium Energy Storage Project demonstrates how cutting-edge technology can solve Africa's energy paradox--abundant renewables with limited access. By balancing technical innovation with ...

Togo launches a pilot green energy storage program to boost renewable power and achieve universal electricity access by 2030.

France's cooperation with Togo in the energy sector extends beyond storage. In October, the African Development Bank and Proparco (part of the AFD Group) announced financial support ...

By adding a 55 MW battery system, Togo can store the excess energy generated by the Blitta plant during the day and dispatch it during evening peak hours or periods of low solar ...
