The world's largest solar farm, in the desert in northwestern Xinjiang, is now connected to China's grid. The 3.5-gigawatt (GW), 33,000-acre solar farm is outside Urumqi, Xinjiang's capital.

China's 3 GW Mengxi Blue Ocean PV Power Plant in the vast and remote Gobi Desert was reportedly commissioned in early November. The plant is located on a former coal mining site in ...

Our solar thermal projects now exceed international standards, offering high cost-effectiveness and stable quality.

The solar thermal energy storage power station can generate electricity with or without direct sunlight, thanks to the heliostats and the molten salt, while achieving stable all-day power output.

Today, covering an area of 609 square kilometers, this solar power base boasts a power generation capacity of 8,430 megawatts, making it the largest in the world, according to Qeyang, ...
