---

The cabinet provides an enclosure that is weather-tight for servers, batteries, inverters and telecommunication equipment with dual AC and DC power inputs/outputs to support different loads.

From outdoor energy storage system cabinets to integrated cloud-based controls, EPC Energy has you covered. We want to help you create a sustainable future.

DC Cabinet is an advanced liquid-cooled outdoor energy storage cabinet designed to support 200+ kW applications with rapid deployment and a minimal footprint, renowned as its integrated safety features.

The ELECOD Outdoor Cabinet ESS for PV Storage & Charging offers an integrated and scalable energy storage solution designed for photovoltaic energy generation and charging applications.

The outdoor photovoltaic energy cabinet can provide reliable monitoring systems, photovoltaic, and battery systems. It is a unified power supply platform system that supports various AC and DC input ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other ...

Cooperate with solar panels to form an energy-saving and green photovoltaic storage system, making it easier to build an independent energy storage system for residential and commercial use.

Whether retrofitting existing infrastructure or building a decentralized energy network, this cabinet empowers businesses to cut costs, enhance sustainability, and ensure uninterrupted power.
