Renewable energy retailer Flow Power has been granted development approval for a 100MW / 200MWh battery energy storage system in Victoria, Australia. The Bennetts Creek BESS is ...

The project, located adjacent to the Morwell Terminal Station in Victoria, represents W&#228;rtsil&#228;'"s tenth BESS project in Australia and the first collaboration with Flow Power.

Victoria welcomes investment in a range of energy storage technologies, including short, medium and long-duration storage. Delivering long duration storage into Victoria ahead of planned coal ...

As Victoria's official visitor resource, our friendly, knowledgeable staff will answer your questions and more. Drop in for free brochures and maps, to book hotels and tickets locally and to make ...

Renewable energy generator and retailer Flow Power has achieved financial close on a 100MW/223MWh battery storage project in Victoria, Australia.

When the Flow Energy BESS is put into operation in 2025, it will allow a greater share of renewable energy in the network, storing electricity produced during the day for use in the evening.

Engineers have developed a water-based battery that could help Australian households store rooftop solar energy more safely, cheaply, and efficiently than ever before.

Uncover the limitless things to do in Victoria. From manicured gardens to afternoon tea and whale watching tours there's something for everyone.
