This article explores market trends, key applications, and how innovative solutions like EK SOLAR's storage systems address Vietnam's energy challenges while supporting sustainable development goals.

The plan encourages rooftop solar PV development. By 2030, 50% of office buildings and residential houses in Vietnam could be equipped with rooftop solar PV panels for on-site use. Battery ...

Vietnam 's Ministry of Industry and Trade is proposing a set of financial mechanisms to support the deployment of residential solar and storage installations designed for self-consumption.

While the country has successfully deployed large-scale solar farms, the combination of distributed rooftop systems with energy storage at industrial scale remains largely unproven locally.

Vietnam's solar energy sector is booming, and energy storage solutions are the key to unlocking its full potential. This article explores the latest trends, applications, and benefits of solar energy storage ...

The 2025 Electricity Law officially recognizes BESS (Basic Energy Storage and Emitter System) as part of Vietnam's national power infrastructure. In April, Decision 988/QD-BCT issued a ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating ...

It mandates energy storage requirements for concentrated solar and supports self-consumption rooftop solar, signalling a long-term commitment to renewable energy integration.
