-----

The Photovoltaic (PV)-powered, Grid Enhanced Mechanical Solution (GEMS) consists of high-efficiency heat pumps for heating, cooling and water heating. This equipment is partially ...

The typical products are PV inverter, storage inverter, lithium battery pack and EV charger that are widely applied to household, industrial and commercial new energy systems.

The PV-GEMS system is designed to significantly cut home energy costs and offers the possibility of operating during power outages, making it a resilient, reliable, and affordable heating, ...

The photovoltaic (PV)-powered, Grid Enhanced Mechanical Solution (GEMS) consists of high-efficiency heat pumps for heating, cooling and water heating. The equipment is partially ...

PV-GEMS will be most effective when deployed along with economical, low-cost retrofit measures including envelope sealing and duct sealing, which enable control of airflow and pressures, improve ...

PV-GEMS--Photovoltaic (PV)-powered, Grid Enhanced Mechanical Solution (GEMS)--is a whole building retrofit measure. It is an especially appealing retrofit option in cases where achieving ...

Demonstrate use of a pre-packaged, mechanical system pod to reduce energy used for heating, cooling, and water heating in existing homes by 75%. Conduct Technology-to-Market activity exploring ...
