Why is the microgrid market growing?

The impressive growth trajectory of the Microgrid Market is driven by factors such as increasing emphasis on decarbonization, growing need for reliable and uninterrupted power supply, and the surging deployment of microgrids for rural electrification.

What is the global microgrid market size?

The global Microgrid Market size was estimated at USD 35.60 billion in 2024 and is predicted to increase from USD 43.47 billion in 2025 to approximately USD 95.16 billion in 2030, expanding at a CAGR of 17.0% from 2025 to 2030.

What are the advantages of microgrids?

Microgrids offer commercial & industrial users significant advantages, such as enhanced energy resilience, reduced dependence on the main grid, and optimized energy costs through demand management and integration of renewable energy sources.

How much does a microgrid cost?

Microgrids are small-scale electricity networks. As of late 2020, more than 1,600 microgrids were opening in the U.S., generating more than 11 gigawatts of electricity. The cost to set up a microgrid ranges from a few hundred dollars for small projects to millions for large microgrids to serve factories, campuses, or entire communities.
