What should I do if my solar panels are damaged?

Regularly inspect your solar panels for damage. Keep tree and bush branches away from your solar panels. Doing so may mean pruning trees and bushes or removing them if they become too large. Regularly clean your panels or have a professional service perform the task.

What happens if a solar panel is broken?

Common causes of solar panel damage are falling objects, thermal stress, and micro-cracks and scratches. A broken solar panel may continue to work, albeit at a reduced efficiency. Broken solar panels pose a serious fire and safety risk and must be removed and replaced. Some companies can fix broken solar panels, but this is costly.

How do I know if my solar panels are damaged?

Consider Equipping Your Home With Solar Panels There are a few ways to detect damage to your solar panels. A visual inspection may reveal broken or cracked glass, a problem with the frame or mounting or damaged or disconnected wiring issues. Your power inverter may also produce an error message if it's designed to do so.

Do you need a professional to fix a solar panel problem?

While some minor fixes, like reconnecting loose wires, can be handled by the user, more complex problems involving inverters or wiring faults often require professional intervention to ensure proper resolution and maintain the safety and efficiency of the solar panel system.
