First trimming machine Model: RO-XBT06 This unit is mainly applied to remove and clean the remains of excessive glue of the modules after laminated; it works self-acting cutting through program setting ...

Used for edge trimming of laminated PV modules to remove excess encapsulation film, glass burrs, or backsheet overflow, ensuring clean edges and precise dimensions.

The ECOTRIM A is a robust automatic trimming station designed to enhance the efficiency of PV module production. This station swiftly trims the four edges of a module, removing any excess ...

The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy operation. Using the trimming ...

Used for edge trimming of laminated PV modules to remove ...

Explore the critical role of solar taping and trimming machines in PV module production. Learn how this equipment works and how to choose the right model.

In the end, taking a good look at what you need is key to finding a solar panel trimming machine that boosts your productivity and supports sustainable practices.

The machine loads and centres the panel from the long edge and trims simultaneously the four edges of the panel with 4 automatic blades, removing the excess auxiliary material of the module after ...
