Can small home solar panels power a small home?

As you can tell, our small home solar panel kits vary widely in terms of what they can power. From small, portable solar panels to six-panel bundles that are capable of providing power to medium-sized homes, there's something in your selection that's perfect for your individual needs.

Are small house solar kits affordable?

Our small house solar kits are affordable and assembled as per your needs. Remember to shop The Inverter Store for the rest of your solar product needs, as we offer additional accessories such as mounting brackets, solar panel cables and connectors, and many more accessories to complete your off-grid home solar system today.

What are small off-grid solar kits?

Our small off-grid solar kits are designed for smaller structures like cabins, treehouses, and tiny houses. These kits are designed for lower wattage output for smaller off-grid applications.

What is included in a solar kit for home?

Our complete solar kits for home already come with just about everything you need to begin harnessing power from the sun, including solar panels, inverters, batteries, cables and solar charge controllers. Typically, we recommend kits ranging from 60 to 720 watts for smaller homes, depending on how many devices and appliances need power.

Find pre-bundled solar system kits designed for small homes, cabins, sheds and more at The Inverter Store. Create your off-grid solar system today.
