VRLA (Valve Regulated Lead Acid) batteries are lead batteries with a sealed safety valve container for releasing excess gas in the event of internal overpressure. Their development was aimed at limiting ...

Designed to protect battery systems, these cabinets and enclosures accommodate various configurations to support both indoor and outdoor installations. Who is Exponential Power?

The construction characteristics of the recombination type lead-acid electric accumulators (valve-regulated hermetic accumulators); the absence of acid fumes and the virtual absence of gaseous ...

Engineered for use with most type of battery terminal models, these cabinets can fit a wide variety of applications. This solution is completely customizable and flexible to support your application ...

Our all outdoor or indoor battery cabinet solutions are designed for maximum flexibility, reliability and suitable for various battery types. There are intelligent enclosures for the batteries to supply more ...

The PowerStor PSLRACK range of sealed lead acid batteries are designed for mission-critical telecommunication and industrial applications requiring longer in-service life, up to 10 years in ...

When unlimited security is not enough. Our battery cabinets are sophisticated and offer modular solutions that can withstand even temperatures and earthquakes when it matters.

Lightweight, easy to handle, cost effective transport and installation. Longer battery life due to less temperature fluctuations. Waterproof, protected against immersion in water (IP67 solutions available)
