---

The wind energy industry has been on an exponential growth curve for more than a decade. POWER looks at the drivers behind the growth and predictions for the future.

US wind installations will rebound in 2025, but the concern lies in the sharply downgraded 5-year outlook. We'll give you one guess why.

And despite ongoing challenges, the wind sector is also poised for a recovery, with the rate of expansion doubling between 2024 and 2030, compared with the period between 2017 and 2023. ...

Global Wind Power Growth Accelerates in the First Half of 2025. The report can here be downloaded in pdf format.

See the projected growth of the wind industry over the next 35 years. All units are in gigawatts (GW). Only states with total capacity over 0.1 GW are included per year. Find out more about the data by ...

In this blog, we explore key findings from the report alongside our 2025 market predictions to offer a forward-looking view of the wind energy sector, where it stands today and what's next.

Projected to expand from \$89.6 billion in 2023 to an impressive \$260.8 billion by 2034, the market is anticipated to grow at a CAGR of 10.2% over the next decade. The wind energy sector is ...

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatthours (kWh) in 2023 to 286 billion kWh in ...
